CONTROL STICK FUNCTION

The Nintendo 64 Controller contains a Control Stick which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press **START** while holding the **L** and **R** buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

STARTING THE GAME

1. Turn OFF the power switch on your Nintendo 64 Control Deck.

WARNING: Never try to insert or remove a Game Pak when the power is ON.

2. Make sure a Controller is plugged into the Controller Socket 1 on the Control Deck.

◆ If you're playing against a friend, plug the other Controller into Controller Socket 2.

3. Insert the Game Pak into the slot on the Control Deck. Press firmly to lock it in place.

4. Turn ON the power switch. The EA SPORTS and FIFA 99 intro sequence appears. If you don't see it, begin again at step 1.

5. To proceed, ► *Menu Navigation* on p. 5. (If nothing appears on the screen, begin again at step 1.)

■ To access the Controller Pak menu, hold **START** while turning the power ON.
